

Creating  
services  
**WITH**  
and  
**FOR**  
people

# Our goal... and your role

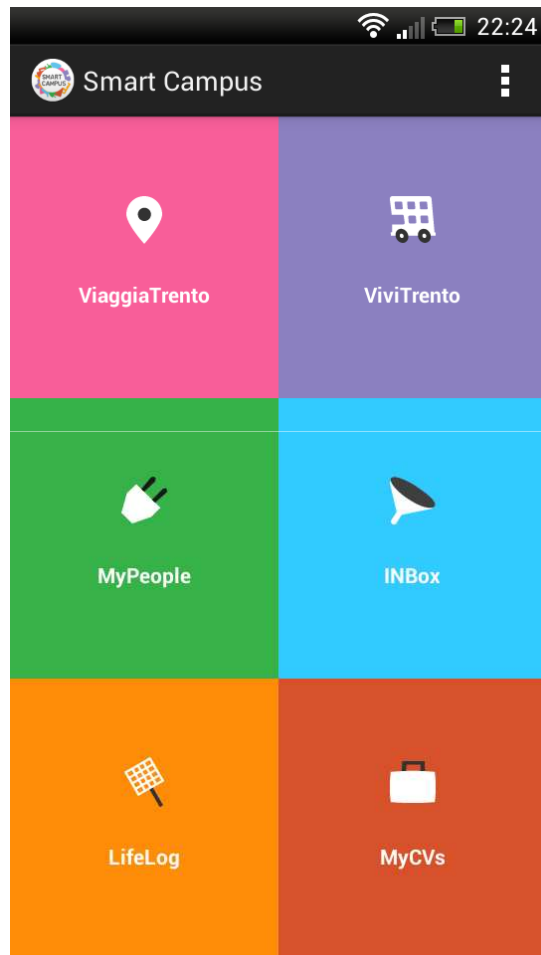

---

- Our ambitious goal:
  - to **increase exponentially the number of services** available to students in Trento...
  - ... involving a **growing community of students** in all parts of the project.
- Your key role:
  - In the project, **students can be users, testers, designers, developers, ...** of the services...
  - ... to ensure that services really serve **their needs**.

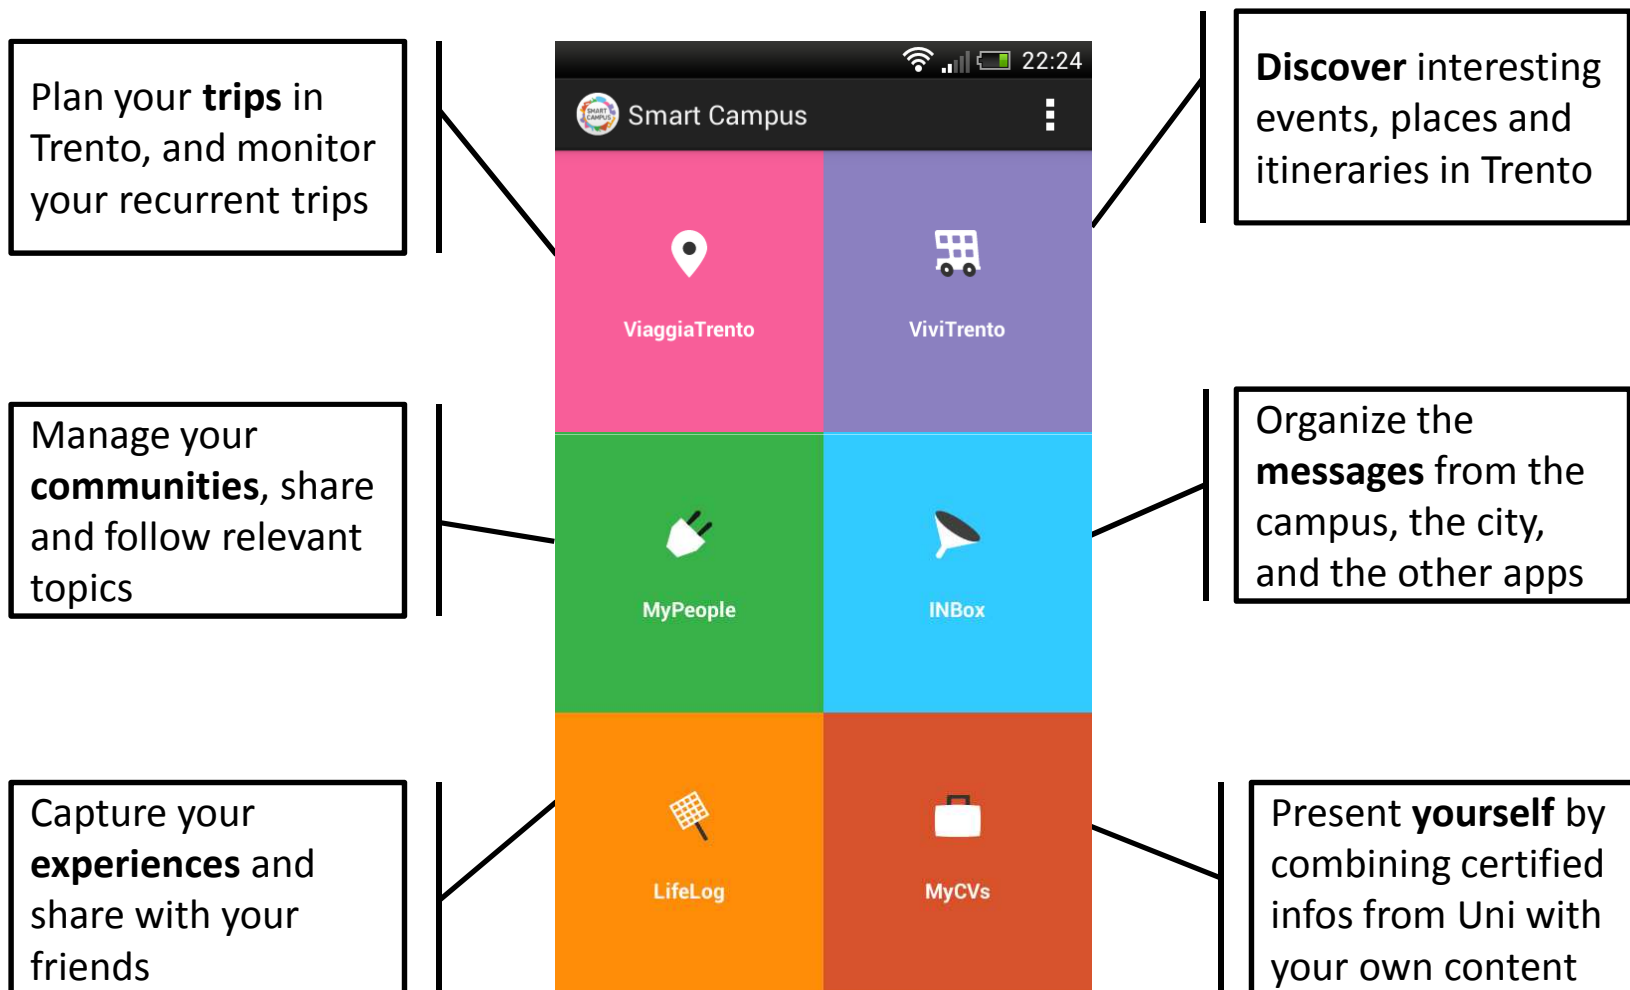

# Which services?

---

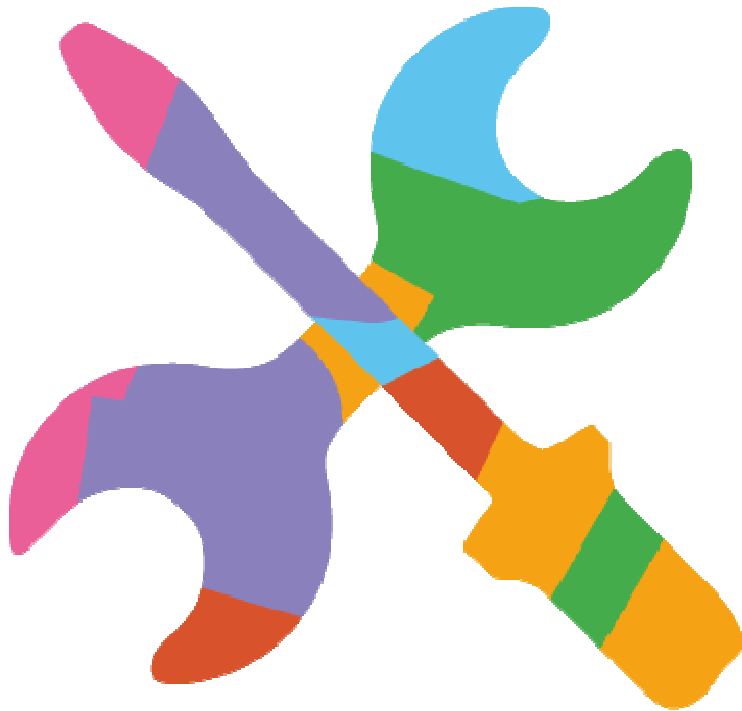

- **Not just services for the academic life, but also services for:**
  - Socializing
  - Moving around
  - Sharing events
  - Signaling problems
  - ...
- **Any service that makes your life easier (and the campus more attractive) is a good candidate.**

# Existing services

# Current status... and next steps

---

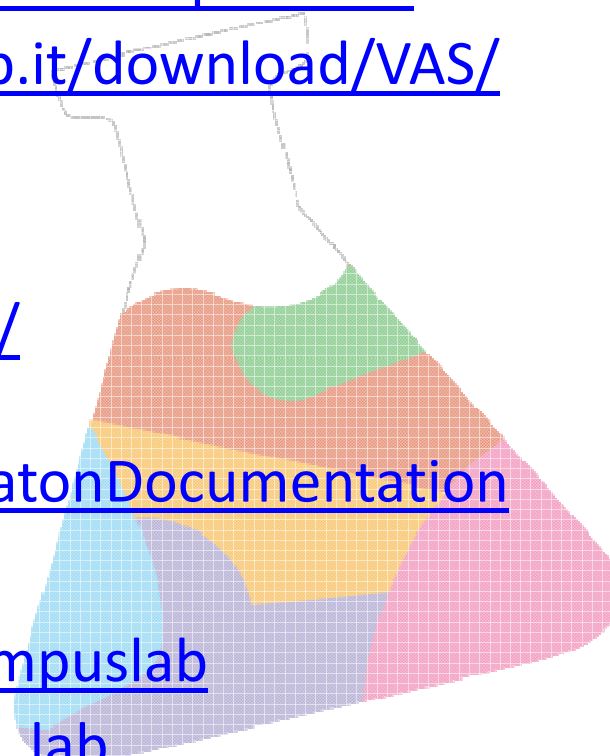

- So far, we have:
  - worked on the **tools**
    - Java-based, SOA-based, open source environment
  - realized the **first 6 services**
    - Journey planner, Discover Trento, Portfolio, Community Manager, Communicator, Experience Buster
  - involved **100 students...**
    - ... as **beta-testers** of these services
    - ... as **designers** of new services
- Now is your turn:
  - Propose and develop an app for the Trentino **Winter Universiade!**

# Hackaton: Resources

---

- **Existing services** (available on android phones):
  - Registration needed: [sperimentatori@smartcampuslab.it](mailto:sperimentatori@smartcampuslab.it)
  - Install from: <http://www.smartcampuslab.it/download/VAS/>
- **Open source code:**
  - Code: <http://svn.smartcampuslab.it/>
  - More info: <http://trac.smartcampuslab.it/>
  - Documentation:  
<http://trac.smartcampuslab.it/wiki/HackatonDocumentation>
- **Follow us:**
  - FaceBook: <http://facebook.com/smartcampuslab>
  - Twitter: [http://twitter.com/smartcampus\\_lab](http://twitter.com/smartcampus_lab)
